

Purchasing Facetime From iTunes By: Alycia M.

Before you begin installing this app, know that you must have an Apple device (Mac, ipod touch, iphone, etc.), or a Mac to be able to use it on.

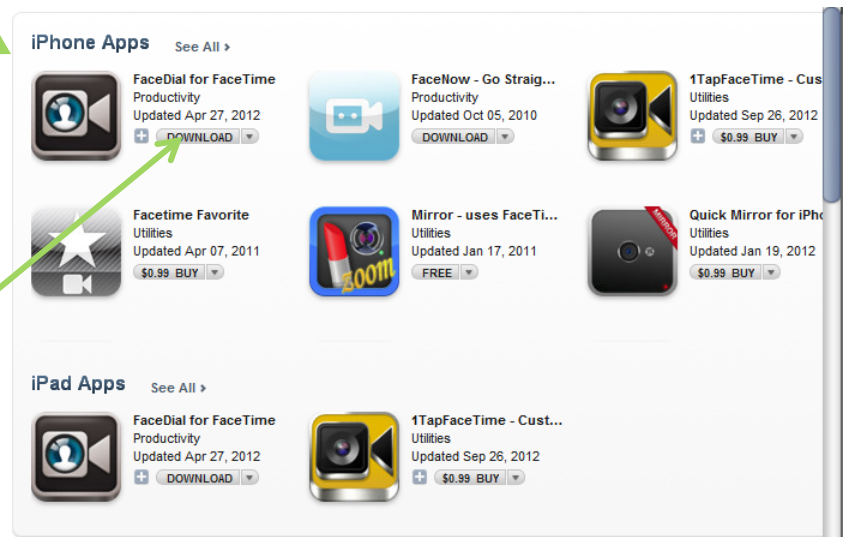

1. Open your iTunes program from your computer using the icon or clicking on the program from the control panel.

2. Go to the "iTunes store" section, and type in "facetime" in the search bar at the top right corner.

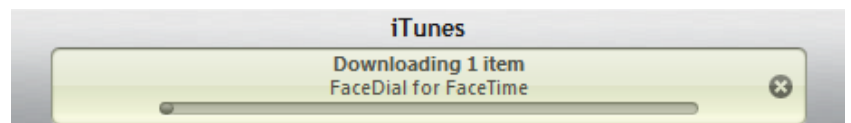

3. Press the enter key and a selection of apps relating to facetime should appear.

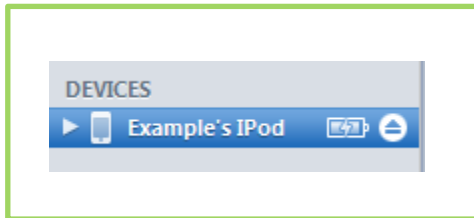

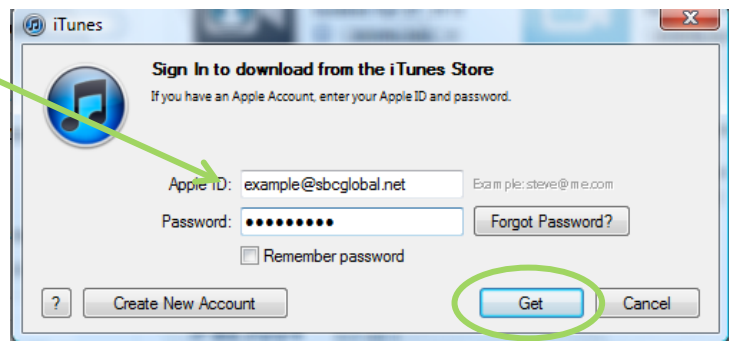

4. Click the desired app or version and press the icon that displays the app's cost to obtain it for the listed price.

5. Check your loading dock and wait for the app to download.

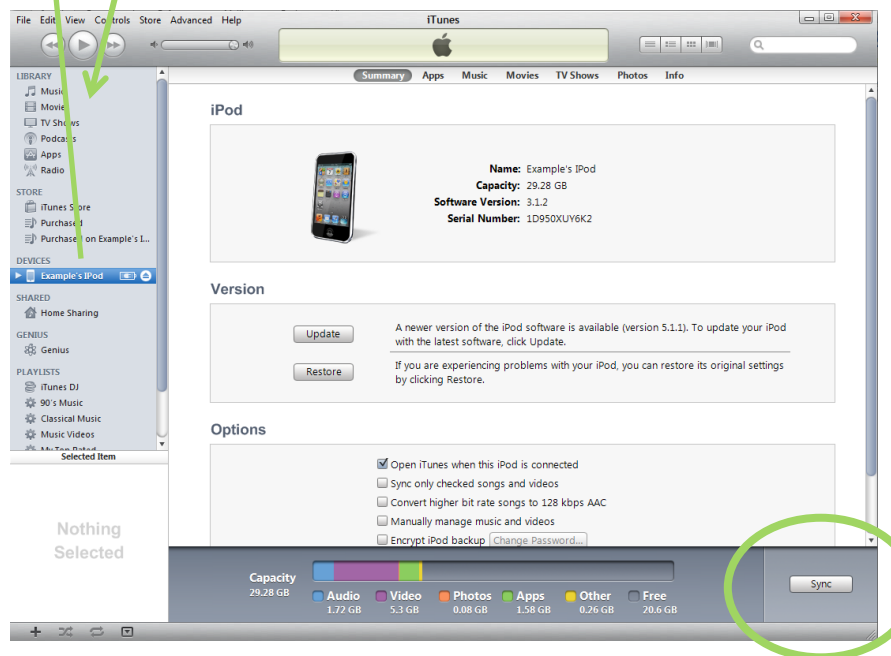

6. When asked for verification, type in your username (usually your e-mail) and password, then “get”.

7. If you want to transfer this app to a mobile device, plug in your device to a USB plug in your computer or laptop, and look for your item to appear in the left sidebar.

8. When spotting it, click its name and press the “sync” icon in the bottom right corner.

10. If it asks you what kind of transfer you want to do, select the option that transfers your iTunes library to you mobile item.

9. Now your app should appear and be ready for use.
